

# Fleetwood Pool News

We are super excited to start thinking about the upcoming 2023 summer season at the Fleetwood Pool! Here are a few updates...

- Our manager, Mary, agreed to another year at the pool – which is great news for everyone involved.
- The year the borough is 150 years old, and officials are looking at a special event at the pool this summer to celebrate. Stay tuned!
- Membership rates have remained the same price for this season! Check out the information below for information about the types of memberships that are offered.
- Unfortunately, the slide had to be removed due to structural concerns. At this time, it will not be replaced. The new regulations state that any new slides that would be installed would need to empty into at least 8 feet of water. At this water depth, this would limit the use of the slide to children who would be able to pass the swim test. A large portion of previous riders were swimmers who met the height requirement of the slide, but were unable to pass the swim test requirement. Another consideration was the lack of space that exists at that water depth without disrupting the space that the swim team needs to access for practices and swim meets. In order to compensate for the removal of the slide, the borough has purchased a more substantial playhouse/slide apparatus which will be placed in the grassy area for the younger guests to play on. In addition, a pool-side basketball net has been purchased.
- 12 additional chaise lounges have been purchased for our members and guests to use while at the pool

Please check out the rest of the information on our website. We are looking forward to a wonderful 2023 summer season at the Fleetwood Pool!
